

Protocols for Laboratories

Face Coverings and PPE

Wear a procedural mask or a cloth face covering that covers the nose and mouth AND the required personal protective equipment (PPE) for the lab.

Replace face coverings when they become damaged, soiled, or contaminated with hazardous materials.

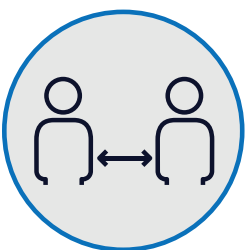

Personal Hygiene

Wash hands for a minimum of 20 seconds with soap and warm water before AND after:

- Putting on or removing face coverings or PPE such as gloves or goggles.
- Using shared equipment or workstations.
- Disposing of trash.

Use hand sanitizer when soap and water are not available.

Avoid adjusting your face covering or touching your face while working.

Physical Distancing

Maintain a 6-foot distance from others.

Modify activities to avoid situations with close proximity.

Designate assigned areas to limit movement through the lab.

Equipment Disinfection

Wear personal protective equipment indicated in the safety data sheet for disinfection.

Disinfect shared equipment and workstations after each use. Follow the instructions for minimum dwell time.

Discard gloves and wipes used for disinfection after use.

Protocols for Shops and Studios

Face Coverings and PPE

Wear a procedural mask or a cloth face covering that covers the nose and mouth **AND** the required personal protective equipment (PPE) for the lab.

Replace face coverings when they become damaged, soiled, or contaminated with hazardous materials.

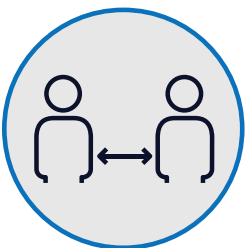

Personal Hygiene

Wash hands for a minimum of 20 seconds with soap and warm water before **AND** after:

- Putting on or removing face coverings or PPE such as gloves or goggles.
- Using shared equipment or workstations.
- Disposing of trash.

Use hand sanitizer when soap and water are not available.

Avoid adjusting your face covering or touching your face while working.
